Having worked with Comm Commercial on various industrial Roofing and Cladding projects over the recent years, I cannot speak highly enough of the service they provide and quality of work they produce. Their commitment to providing a quality service and their attitude towards getting things right first time is highly commendable. They're a pleasure to work with and a contractor I'll always put my trust in.

Perfect Sense Energy and it's associated companies have been working successfully in partnership with Comm Commercial since 2021 to deliver several industrial projects for our clients. The team at Comm Commercial are the most knowledgeable we've experienced in the roofing & cladding sector and are always responsive to our needs and our clients requirements, delivering on time, on budget every time. We therefore highly recommend Comm Commercial to anyone looking for a professional and reliable industrial roofing & cladding contractor

“

Gary Brandwood

Perfect Sense Energy

A high-angle photograph of a construction worker on a large, corrugated metal roof. The worker, wearing a white hard hat, a high-visibility vest, and dark clothing, is walking towards the right side of the frame. In the lower-left foreground, an orange and white traffic cone sits on the roof. The roof surface is made of grey corrugated metal with several rectangular patches or skylights. In the background, a city skyline is visible under a cloudy sky, with a large industrial building and a power line tower on the left. A large, semi-transparent circular graphic is overlaid on the right side of the image.

Roofing

with Comm Commercial

Roofing

We are committed to delivering **reliable** and **tailored roofing solutions** to meet your specific requirements. Specialising in metal cladding, both composite and built-up systems, flat roofing options including single-ply and felt systems, and liquid coatings, we bring a wealth of **experience** to every project. We take pride in our collaboration with **major suppliers nationwide**, ensuring that we use high-quality materials to enhance the **durability** and **longevity** of your roofing requirements.

Surveys

We conduct condition surveys for various commercial buildings, encompassing diverse **roofing** and **cladding types**. During a site visit, our experienced professionals thoroughly examine the building envelope, providing a **detailed report** based on the specifications of our Clients. We provide drone services, intrusive and non-intrusive surveys of building envelopes including their condition and build-up. If requested, we can provide budget costs for the recommended remedial action.
